

Instructions

1. Integer or Finite Decimal

- If the answer key is an integer, for example, 23, enter **23**. Do not enter 23.0.
- If the answer key is a positive integer, don't enter the '+' sign. For example, if the answer key is 23, enter 23, not +23.
- If the answer key is a negative integer, please enter the '-' sign first. And there is no space between the '-' sign and the following digit. For example, enter '-23', not '- 23'.
- No space or comma within an integer. For example, if your answer is 1000000. Please don't enter 1,000,000 or 1 000 000. Please enter **1000000**.

2. Fraction ($\frac{x}{y}$)

- A “common fraction” is to be considered a fraction in the form $\pm\frac{x}{y}$
- Enter $\frac{x}{y}$ as **x/y**. Use “/” to differentiate the numerator and denominator

Express 12 divided by 8 as a common fraction.

Acceptable: 12/8

Unacceptable :12/8, 6/4

For Example, What is the probability that a green marble will be chosen?

Answer: 2/9

3. Irrational Numbers

Square Root

- Use SQRT to indicate the square root of given number
- If your answer is $\sqrt{3}$, enter **SQRT(3)**

Power

- Use carat symbol (^) to denote power
- For the answer e^x , enter **e^x**
- **x^(1/3)** gives the cube root of x
