

DEBRIEFING FORM FOR MORALITY GAME PARTICIPANTS

DEBRIEFING FORM FOR MORALITY GAME PARTICIPANTS

- Platform Title: The Morality Game
- Platform Creator: Gregory Stanley, Ph.D. Candidate, University of Michigan

Thank you for participating in the experiment hosted on this platform. Your time and efforts contribute greatly to the advancement of research on cooperation and social dilemmas. Please read this debriefing form to understand the general purpose and specifics of the study you took part in.

GENERAL PURPOSE OF EXPERIMENTS ON THIS PLATFORM

The platform aims to increase the quality of research on cooperation by standardizing methods, consolidating open-access data, and facilitating the rapid deployment of experiments. It investigates factors that reduce and promote cooperation through interactive online social dilemmas.

SPECIFIC PURPOSE OF YOUR STUDY

This, the first experiment on this platform, aims to test and model moral and strategic choices in the simplest possible social choices, called binary Dictator Games, where one person chooses how many payoffs to allocate between themselves and another participant. Our goal is to predict future choices based on past choices, where choices are defined by payoffs.

CREDIT AND FUTURE PARTICIPATION

- Credit: Please click the completion URL displayed at the end of the experiment. If you already refreshed or left the page, then you can access this URL in your profile page, which you can access from the top right corner of your screen.
- Future Participation: We highly encourage your continuous participation in various studies, as it enhances the value of the data and contributes to scientific progress.

CONTACT INFORMATION

Should you have any questions or concerns related to this specific experiment, please contact the responsible researchers. For general platform-related queries:
