Human Resources
Comerica Bank

Dear Hiring Team,

My name is Shikha Nukala and I am currently pursuing a Bachelor's in Computer Science at University of Michigan. I have spent the last year learning and implementing algorithms to write programs that apply to real-world scenarios and learning introductory principles in cyber security. I am excited to bring this knowledge and practice to Comerica as a Summer 2024 Intern in Cyber Security and Technology.

I have over three years of experience using Java, C++, MATLAB, and Python through high school and college courses, as well as college clubs and online resources such as GitHub and Leetcode. I have used a variety of algorithms in C++ and Python to implement machine learning programs. Additionally, I have used open source development to collaborate with other coders and start on project demos such as programming an in-home assistant. I also have over five years of experience as a varsity debater, giving me strong public speaking and communication skills as well as extensive research skills. This summer, I worked for Roosevelt Innovations, a company that focuses on writing business rules for claims-processing. This internship has given me the unique opportunity to work with rule-based systems and create software on a fundamental level through software tools such as ANTLR and Lisp, and understand the importance of ground-level software.

I have read about the Cyber Security internship experience at Comerica Bank, and hearing about the team's inclusive environment and important role greatly interests me in this position. With my background in coding algorithms, introductory cyber security operations, researching a variety of topics, and giving presentations, I can help Comerica Bank with various projects for enhancing security software, identifying potential risks, and improving security strategies. In turn, I would gain firsthand experience working for a large organization and learning from experts.

In my academic and career development, I have sought to work hard while learning and improving as I gain more experience. I intend to bring the same energy, drive and commitment to this role and your organization. Please feel free to contact me at (517) 899-8126 or snukala1@gmail.com. I look forward to speaking with you and appreciate your time and consideration.

Thank you,
Shikha Nukala
